SUMMARY

Motivated .NET Developer with 6 months of practical experience in building web applications using ASP.NET Core and C#. Comfortable working with Entity Framework, LINQ, and SQL Server to handle backend development, as well as using jQuery for enhancing user interactions on the frontend. I enjoy learning by doing and have been part of a team where I contributed to writing clean, maintainable code and improving existing features. Looking to further develop my skills and grow in a dynamic development environment.

PROJECTS

Restaurant Management System

Tech Stack: ASP.NET MVC, Entity Framework Core, LINQ, jQuery, Razor Pages.
Built a role-based restaurant management system with three types of users:

- Admin** – Manages everything including user roles, items, tables, and permissions.
- Account Manager** – Manages all features except role-based permissions.
- Chef** – Handles order updates and item preparation statuses.

Key Features:

- Dynamic role-based access control with enable/disable permissions (e.g., edit, delete).
- Automated flow for adding items, generating waiting tokens, assigning tables, managing orders, and updating item statuses (e.g., in-progress, prepared).
- User-friendly frontend using Razor Pages and jQuery.

What Makes It Different:

- Generic pagination across views.
- Clean n-tier architecture: View → Service → Repository → Model.
- Generic repository methods for reusable and optimized code.
- Interface-based abstraction in repositories and services.
- Focus on clean code and efficient database queries.

YelpCamp

Tech Stack: ASP.NET MVC, Entity Framework Core, Identity, LINQ.
Developed a camp tracking web application where users can create, edit, and delete campgrounds. Other users can view camps and submit reviews based on their experience. The system includes secure user authentication and session management using ASP.NET Identity.

Key Features:

- User authentication and authorization with ASP.NET Identity.
- CRUD operations for campgrounds and user reviews.
- Session-based login/logout functionality.
- Clean MVC structure with LINQ queries for data handling.

EDUCATION

Bachelor - Computer Engineering
LDRP Institute of Technology & Research
2021 - 2025 Gandhinagar

High School Class - PCM
Jawahar Navodaya Vidyalaya
2018 - 2020 Rajkot

Percentage
87.2 / 100
